## PROFESSIONAL SUMMARY

---

MCA student graduating in 2026 with hands-on experience in full-stack development using Python, Django, React, and REST APIs. Built scalable web applications including AI-powered travel planning, academic management, and e-commerce systems. Strong interest in backend engineering, AI applications, and modern software development.

## EXPERIENCE

---

### Software Engineer Intern | BAOBAO PTE LTD | Jan 2026 - Apr 2026

- Collaborated with developers to build and test software modules using modern development practices.
- Debugged and resolved application issues to improve system performance and reliability.
- Participated in feature development, API testing, and project deployment workflows.

## TECHNICAL SKILLS

---

|                   |                                                  |
|-------------------|--------------------------------------------------|
| <b>Languages:</b> | Python, JavaScript, HTML5, CSS3                  |
| <b>Frontend:</b>  | React.js, Responsive UI Design                   |
| <b>Backend:</b>   | Django, Django REST Framework, Node.js           |
| <b>Database:</b>  | SQLite, PostgreSQL                               |
| <b>Tools:</b>     | Git, GitHub, Postman, VS Code                    |
| <b>Concepts:</b>  | REST APIs, JWT Authentication, Responsive Design |

## PROJECTS

---

### TeachFlow (Performance Based Appraisal System) — 2026)

- Developed a full-stack academic performance management system for educational institutions using Django REST Framework and React.js.
- Built real-time analytics dashboards for tracking faculty performance, research publications, and institutional activities using Recharts and dynamic data visualization.
- Implemented role-based access, automated PBAS report generation, and secure authentication to streamline academic appraisal workflows.
- Designed responsive UI with modern frontend architecture, improving data management efficiency and reducing manual reporting processes.

### Travel Buddy (AI Travel Planning Platform) — 2025

- Developed a full-stack travel planning application using React.js, Django REST Framework, and PostgreSQL, enabling trip creation and day-wise itinerary management.
- Integrated OpenStreetMap, Overpass API, OSRM, and Nominatim to provide route-based itinerary discovery, live map visualization, and travel distance/ETA tracking.
- Implemented collaborative trip sharing with secure tokenized invite links, guest access, and multi-user trip management features.
- Built a smart packing checklist system that generates personalized travel essentials based on trip duration, destination, and weather conditions.

## EDUCATION

---

**Master of Computer Applications (MCA)**, Mahatma Gandhi University  
Marian College Kuttikkanam (Autonomous) 2024 – 2026  
CGPA: 8.5/10

**Bachelor of Computer Applications (BCA)**, Mahatma Gandhi University  
Santhigiri College of Computer Applications, Vazhithala 2021 – 2024  
CGPA: 6.4/10

## CERTIFICATE

---

**National Service Scheme (NSS):** Participated in various community development and social service activities.

**Data Visualization Using Python:** Completed a course on data visualization with Python for effective data representation.

**Data Science Tools:** Comprehensive study of essential data science tools and their applications.

## ACHIEVEMENTS

---

- Led a **workshop on Django development** for BCA students at Assumption College, Changanassery.
- Volunteered in **NSS activities** including cleanliness drives, blood donation camps, and environmental awareness programs.
- Recognized for leadership and active involvement in NSS annual camp activities.
- Chosen as class representative to coordinate academic and event-related tasks.
